## القوانين الخلقية Rules of creation

Rules of creation: (A) In the Universe, (B) In the human being.

(A) From the rules of creation in the Universe

1. The Miracle of Life: Creation (life and death).

Allah the Almighty said in Surat AL-An'am (6) - Verses 95.

"Verily, it is Allah who causes the seed-grain and the fruit-stone to split and sprout. He brings forth the living from the dead, and it is He who brings forth the dead from the living. Such is Allah, then how are you deluded from the truth?"

This is the great miracle: the miracle of life:

its initiation and its progress.

No one knows the secret of this miracle, nor can do it

other than Allah.

Conclusion: In every moment the life begins in a plant, tree, a bird,

or an animal, it remains in both substance and source a secret  
which is known only to Allah. (e.g.) Rules of miracle of life  
① From the beginning, our planet,

Earth exists, but there was no life on it. Then the life begins

after Allah originates it. Rule (1) It is Allah alone who can originate

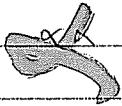

life from something that is dead, which will be transformed by

Living creatures into organic living substances that form part of the living bodies. <sup>Rule of life</sup> ~~this is the life cycle~~ e.g. a plant coming out of a seed and a seed contained in a plant. A chick coming out of an egg and an egg produced by a bird.

Let us reflect for few seconds and ask ourselves....

- 1) Where in the seed, the roots, sticks, leaves and fruits are hidden?
- 2) Where in the egg do the bones, meat, feathers, colour and singing of the bird hide?

Conclusion (2) In reality life continues to be a great mystery that has a question which cannot be answered unless we all admit that it is Allah the Creator who give life.

 And let us always remember this example: The food we eat dies as a result of cooking and exposure to heat, but it is then transformed into blood inside the living body and then it becomes dead waste as a result of body Process.

From the rules of creation in the Universe: rule (2) and rule (3) are related to the same goal.

(Rule → 2) "Allah has created every thing with Qadar (Divine Preordainments of all things before their creation)." refer to Surat AlQamer (54) (49).

It is the Decree of Allah to create every thing in the universe with due measures regarding <sup>(A)</sup> its size, shape, situation characters and its relations to all around it. Every thing in the universe <sup>(B)</sup> its existence and movement is decreed by Allah

the All mighty. It is the Decree of Allah to create the stars in the sky and to distribute every one in special position, and it is the same "Allah's Decree" to create the plants in the desert, the fishes in the sea, the mountains, the rivers, the seas, the forests

It is "Allah's Decree" <sup>(behind every event related to all)</sup> which is the source of all the creation on the earth and in the heavens.

It is the lesson from the Quran so that every believer submits himself to Allah, the Creator of every thing.
